mode: NORMAL

7, 41

```
1 Vim has two basic modes. One is insert mode, in which
  you write text as if in normal text editor.
2 Another is normal mode which provides you efficient
  ways to navigate and manipulate text.
3 At any time, you can see which mode you are in on the
  status bar which is located at the top of the editor.
4 To change between modes, use Esc for normal mode and i
  for insert mode
5 Let's try it out! First, change to insert mode.
6 Good, now you're in insert mode. Write something and
  change back to normal mode.
7 Good. Let's move on to another section.
```

mode: INSERT

6, 82

mode: NORMAL

3, 22

- 1 `gg` takes you to the beginning of the file; `G` to the end.
- 2 To jump directly to a specific line, give its `line number` along with `G`.
- 3 `gg! G` majorly rocks.
- 4 Now go to the beginning of this screen with `gg` and then back to end with `G`.
- 5 Go to line 2 with `2G`.

mode: NORMAL

3, 76

- 1 `gg` takes you to the beginning of the file; `G` to the end.
- 2 To jump directly to a specific line, give its `line number` along with `G`.
- 3 Now go to the beginning of this screen with `gg` and then back to end with `G`.

mode: NORMAL

5, 27

```
1 To insert text into a new line, press o or O
2 After new line is created, the editor is set to insert
  mode.
3
4
5 I bet you feel like O__O
6 Yep! Now big O to insert new line above the current
  line.
7 Write a bit and get back to normal mode.
```

mode: INSERT

3, 1

```
1 To insert text into a new line, press o or O
2 After new line is created, the editor is set to insert
  mode.
3 █
4 Write a bit and get back to normal mode.
```

mode: NORMAL

4, 1

- 1 **d** is the delete command
- 2 You can combine it with movement, e.g. **dw** deletes the first word on the right side of the cursor
- 3 **a**lso copies the content, so that you can paste it with **p** to another location (on real Vim).
- 4 The word is gone. Now let's remove two words with **d2e**.

mode: NORMAL

3, 1

- 1 **d** is the delete command
- 2 You can combine it with movement, e.g. **dw** deletes the first word on the right side of the cursor
- 3 **a**lso copies the content, so that you can paste it with **p** to another location (on real Vim).

mode: NORMAL

3, 1

- 1 **d** is the delete command
- 2 You can combine it with movement, e.g. **dw** deletes the first word on the right side of the cursor
- 3 **I**t also copies the content, so that you can paste it with **p** to another location (on real Vim). **█**

mode: NORMAL

4, 1

- 1 **d** is the delete command
- 2 You can combine it with movement, e.g. **dw** deletes the first word on the right side of the cursor
- 3 also copies the content, so that you can paste it with **p** to another location (on real Vim).
- 4 **█** is gone. Now let's remove two words with **d2e**.
